

# 我和我的朋友

## 第五课

Objective:

- Reading comprehension – to consolidate what has been covered in previous lessons.

Note for teachers: You may like to either print out the three texts and organise a jigsaw reading activity, or do a pair reading activity in your class. You can also give each student a post-it note and ask students to write down the characters they don't know. You then walk around and collect the post-it notes and explain the characters to all of the students.
